Quick Way to Track Down Rogue Advertisements

Inevitably some adverts will display where they shouldn't this short guide is to help track down ads that are showing in the wrong place in order to correct them.

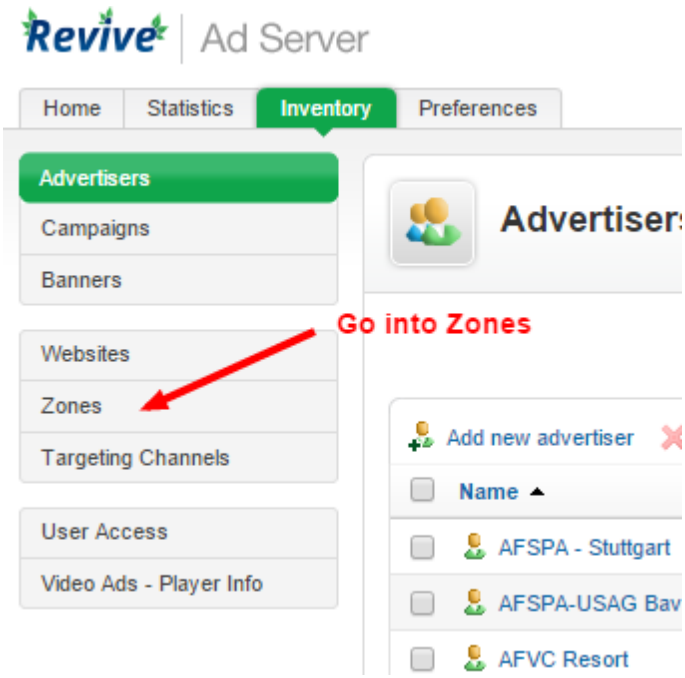

Open up the webpage in your browser and refresh it until you see the rogue ad:

Move your mouse cursor over the ad but do not click it – the ad URL will become visible in the browser's status bar. Make a note of the bannered.

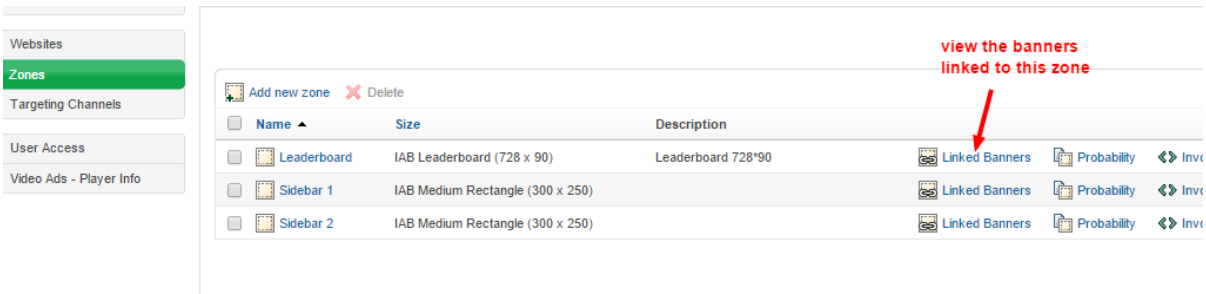

Go to Revive > Inventory

Open Zones

Find the zone that the ad appeared in and click on linked banners

Continued on next page

This page shows all of the banners linked to a particular zone along with the banner id and the name of the campaign.
